YASH SURESH NEMANE

Electrical Engineering Student | B.E. Electrical, 3rd Year
+91 80871 89936 • yashnemane28@gmail.com • Maharashtra, India

CAREER OBJECTIVE

Third-year Electrical Engineering student with a strong foundation in power systems, control systems and electrical machines, complemented by practical IoT knowledge and real-world project experience. Seeking an internship or industrial training opportunity in Electrical Engineering to apply core electrical fundamentals to practical, technology-driven solutions while growing in a professional environment.

PROFILE SUMMARY

- Completed industrial training in transformer repair and maintenance, gaining practical exposure to real equipment.
- Hands-on experience in automation and embedded systems using Arduino and ESP32, applied in academic projects on energy efficiency and remote monitoring.
- Proficient in MATLAB, Simulink, AutoCAD and Fusion 360, with working knowledge of Python and Microsoft Office (Word, Excel and PowerPoint).
- Basic hands-on experience with electric vehicles (EVs).
- Additional skills: web development and prompt engineering.

EDUCATION

B.E. – Electrical Engineering **Pursuing (3rd Year)**
Shri Sant Gajanan Maharaj College of Engineering, Shegaon **CGPA: 7.09**

- Core areas: power systems, control systems, electrical machines.

HSC (12th) **64.67%**
G S College, Khamgaon

SSC (10th) **83%**
A K National High School, Khamgaon

TRAINING & INTERNSHIPS

Industrial Trainee – Transformer Repair & Maintenance
Jagadamba Electronics (Shivaji Industries)

- Gained hands-on exposure to transformer repair and routine maintenance work.
- Observed transformer construction, including core, windings and insulation.
- Learned how faults are inspected and how transformers are tested after repair.
- Followed workshop practices and safety discipline in an industrial environment.
- Understood the importance of preventive maintenance in keeping electrical equipment reliable.

Internship **3 Months**
Shubham Electronics, Khamgaon

- Assisted experienced technicians with day-to-day electrical work.
- Gained hands-on experience with electrical circuits.

Internship **2 Months**
Yash Industries (Pears Soap Manufacturing), MIDC, Khamgaon

- Worked on various machines according to requirements.
- Gained hands-on experience with machines in an industrial setting.
- Outcome: Learned about industrial operations and coordination.

ACADEMIC PROJECTS

1. The Future of Agriculture: Innovations in Agricultural Technology **Completed: 2025**

- **Objective:** To develop a sustainable agricultural system using organic farming and renewable energy.
- **Concept:** Integrated organic manure preparation, a relay-based animal deterrent system, and solar-powered UV insect trapping.
- **Benefits:** Improves soil fertility, protects crops, reduces chemical pesticide usage, and promotes eco-friendly farming.

2. Remote Farm Automation and Water Monitoring System **Completed: 2026**

- **Objective:** To monitor and control water supply on a farm automatically from a remote location, avoiding manual checks and water wastage.
- **Concept:** Sensors measure water level and soil conditions in the field, and a microcontroller-based unit (Arduino / ESP32) sends this data to the user. Pumps and valves can be switched on or off remotely, so the farmer stays in control without being physically present.
- **Benefit:** Saves water, power and time, and supports efficient, timely irrigation.

3. Low-Bandwidth Telemedicine Platform for Rural Areas **Completed: 2026**

- **Objective:** To help villagers in low-network areas connect with doctors and access basic healthcare services.
- **Concept:** A lightweight website that works with very low bandwidth and supports offline use. It includes a medical chatbot for basic guidance and low-bandwidth voice call support for consulting doctors.
- **Benefit:** Brings healthcare access to remote villages, reducing travel and delays in medical advice.

4. Automation Platform for Local Shop Owners **Completed: 2026**

- **Objective:** To help local shop owners reach more customers and manage their business digitally.
- **Concept:** A web-based platform where shop owners can showcase their shops, organise customer and sales data, and connect with multiple customers at once.
- **Benefit:** Increases customer reach, saves time on record keeping and improves business growth.

TECHNICAL SKILLS

Core Subjects	Power systems, control systems, electrical machines
Software	MATLAB, Simulink, AutoCAD, Fusion 360, Microsoft Office (Word, Excel and PowerPoint)
Programming & Hardware	Python, Arduino, ESP32
Additional Skills	Web development, prompt engineering
Practical Exposure	Transformer repair, maintenance, fault inspection and testing; basic hands-on experience with electric vehicles (EVs)

LEADERSHIP EXPERIENCE

- Technical Head – E-Cell (Entrepreneurship Cell)
- Publicity Head – Navonmesh (Technical Fest)

CERTIFICATIONS & ACHIEVEMENTS

- **NxtWave – Generative AI:** Personal Gen AI chatbot
- **Hacktoberfest:** Open-source contribution event
- **MS-CIT (93%):** Computer literacy certification
- **NCC (A+ Grade):** National Cadet Corps certificate

AREAS OF INTEREST

Power systems and energy efficiency • Control systems and automation • Electrical machines and transformers • Electric vehicles (EV) • Embedded systems and IoT • Equipment maintenance and reliability

PROFESSIONAL SKILLS

- **Teamwork:** Work well in groups and contribute to shared goals.
- **Communication:** Explain technical ideas clearly.
- **Problem-solving approach:** Break down technical problems and work towards practical solutions.
- **Adaptability:** Quick to learn new tools, processes and work environments.
- **Leadership:** Led technical and publicity teams for college events.

ADDITIONAL INFORMATION

- Languages: English, Hindi, Marathi (fluent)
- Nationality: Indian

DECLARATION

I hereby declare that the information given above is true and correct to the best of my knowledge.
